Complex software \rightarrow Complex UI?

Most people don't seem to really mind.

But they are comfortable with phones, tablets...

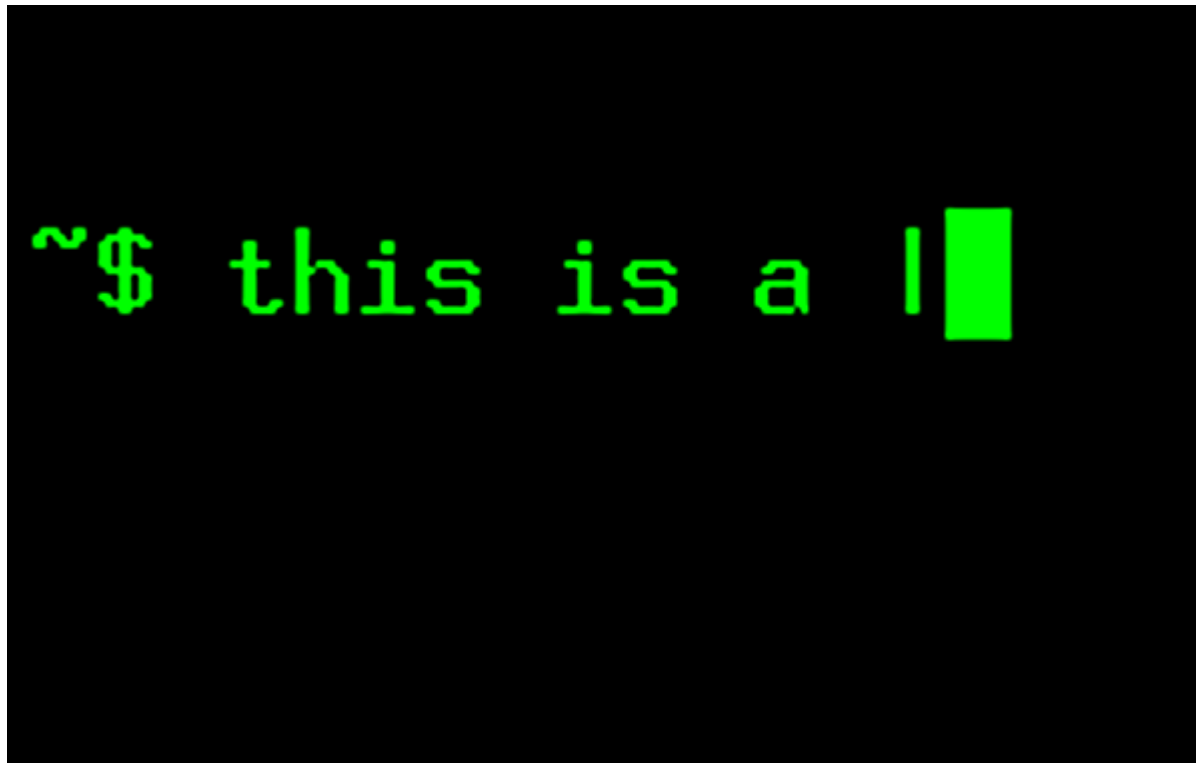

... and in lot of Flash apps.

Each App being an isolated island.

Well, me I'm just a stupid user. . .

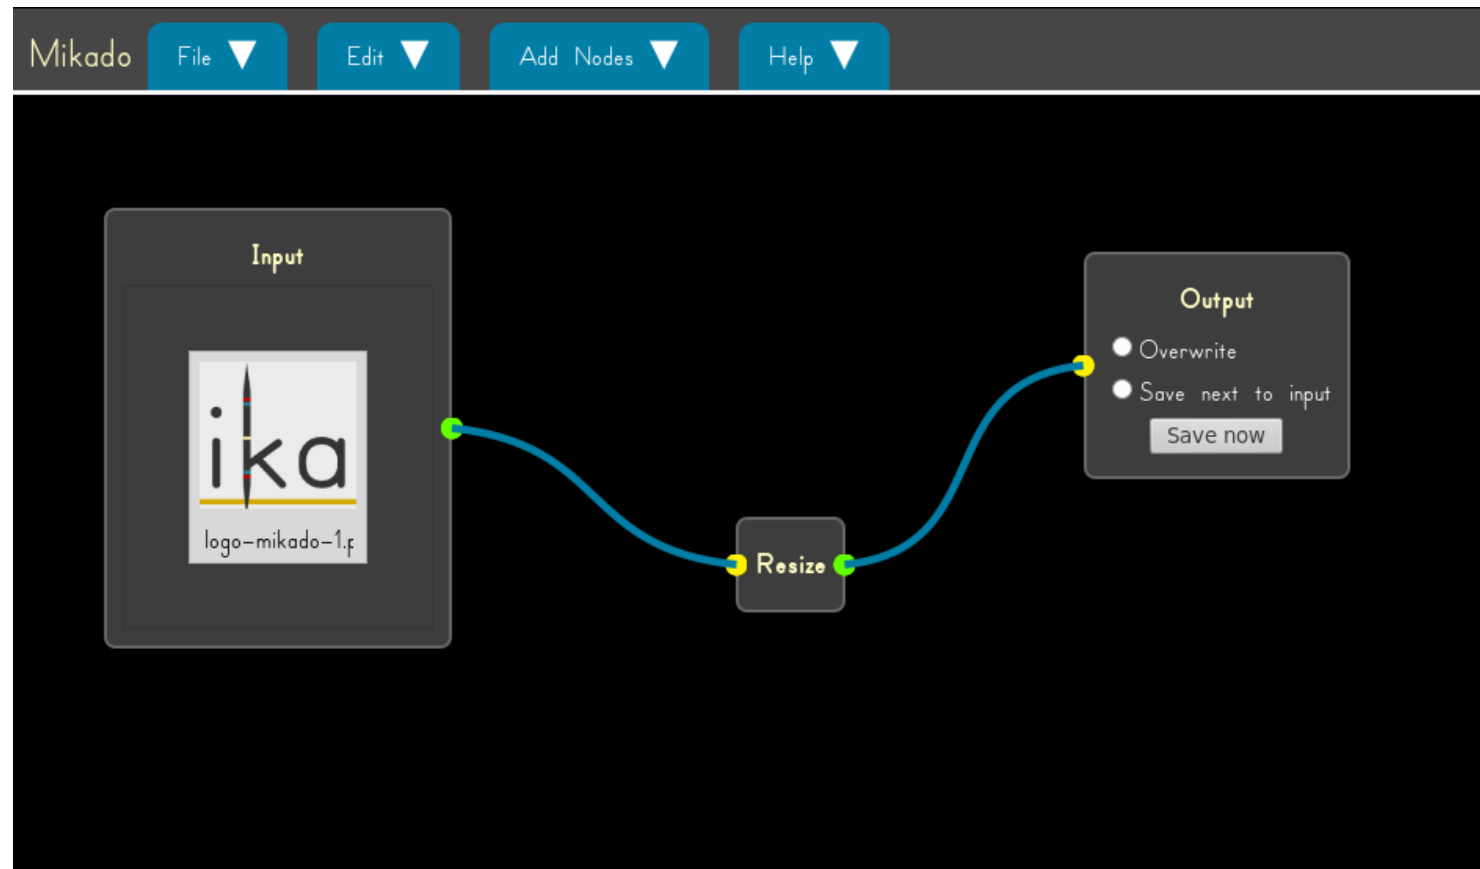

Est-ce que ceci est la |?

```
$ ls -al | cut -c14-16,21- | sort -k5

Terminology: a graphical terminal

A GUI inspired by node based editors?

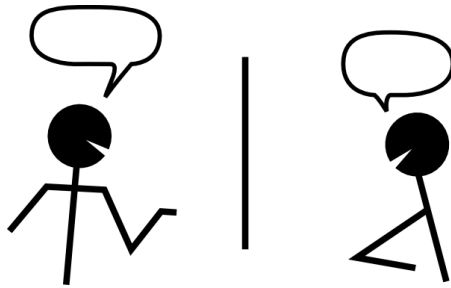

The Phatch way

XML could be the glue

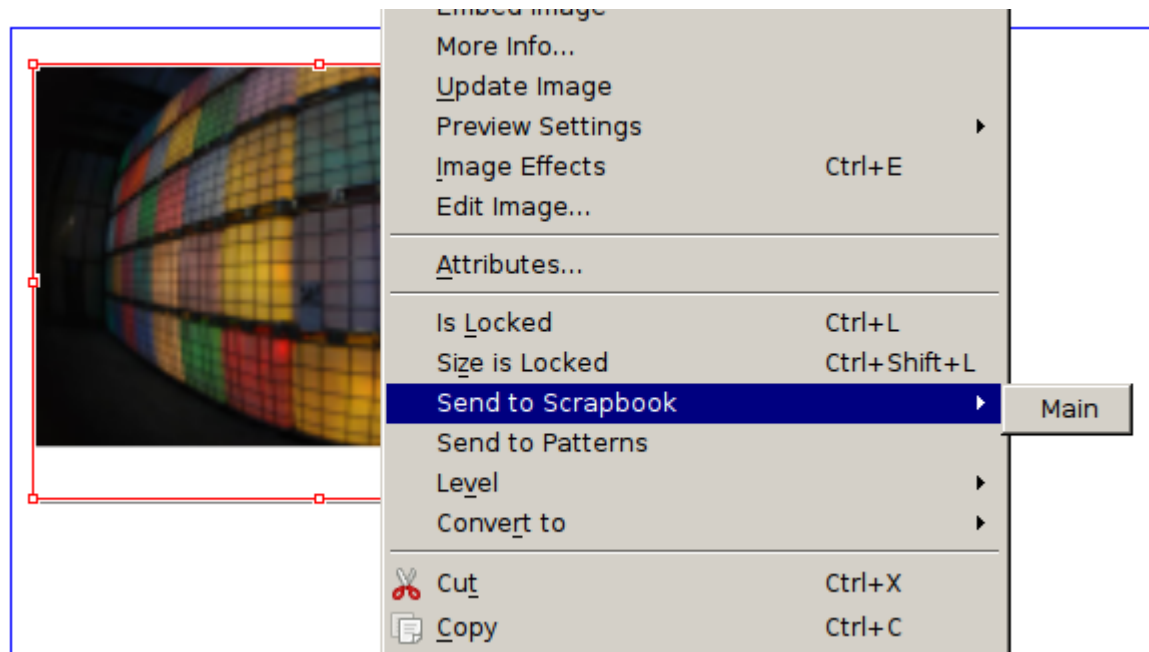

```
.lir: ImageMap  
  xmlns:lir=  
    <im:shape  
      xmlns:  
        type=""  
        name=""  
        coordi
```

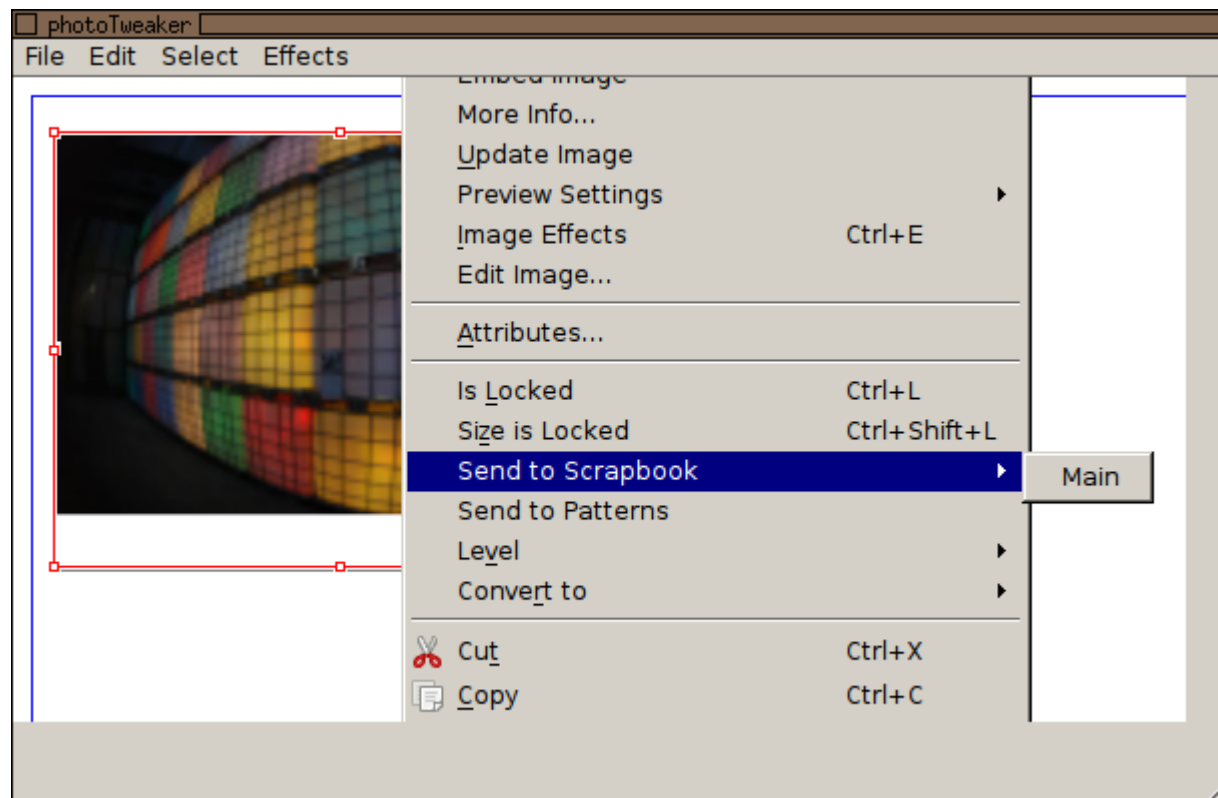

How “fat” can the pipe be?

I've tried it out!

Taking the screenshot ...

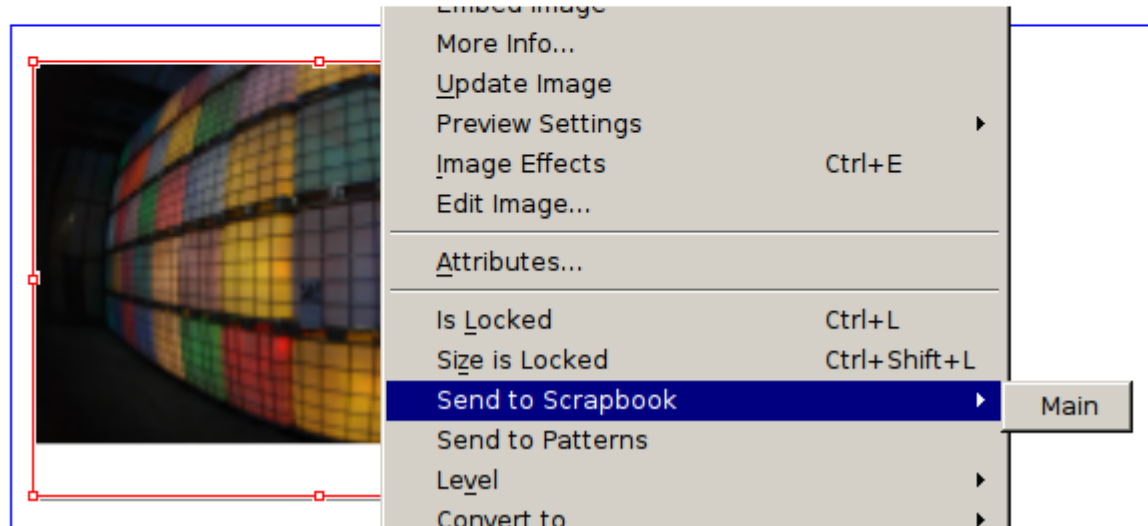

... cropping and scaling...

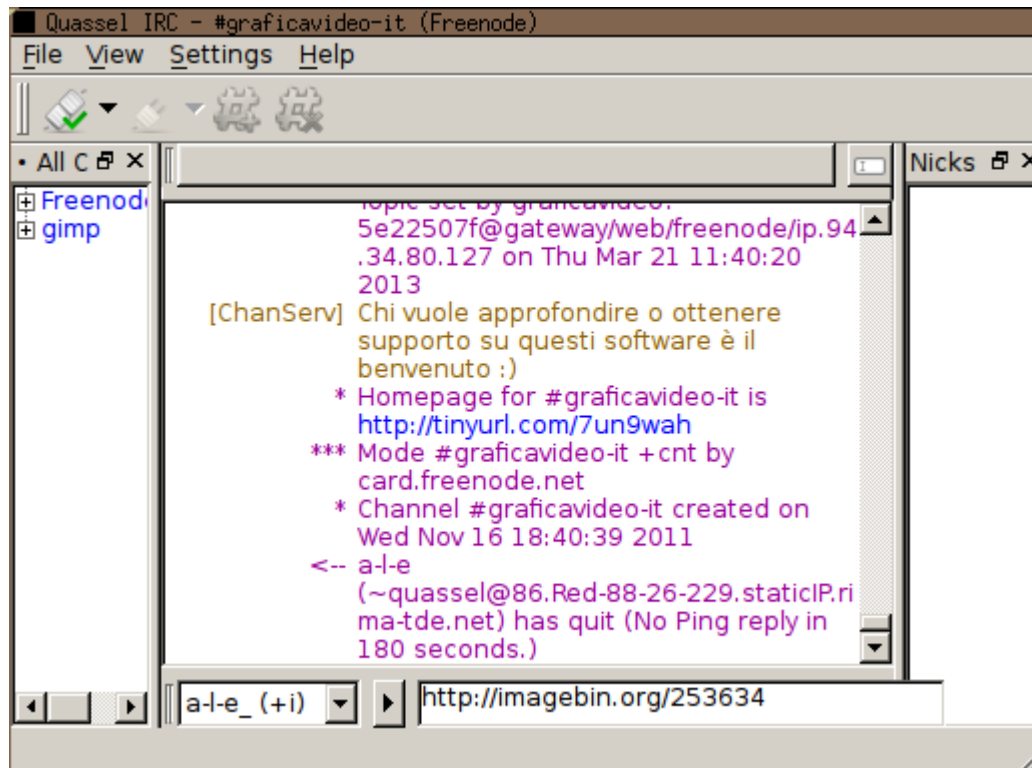

... uploading ...

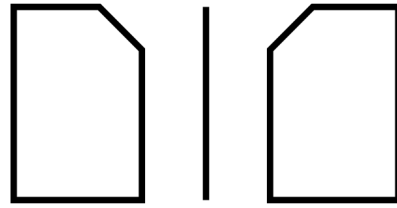

Imagebin

A place to slap up your images.

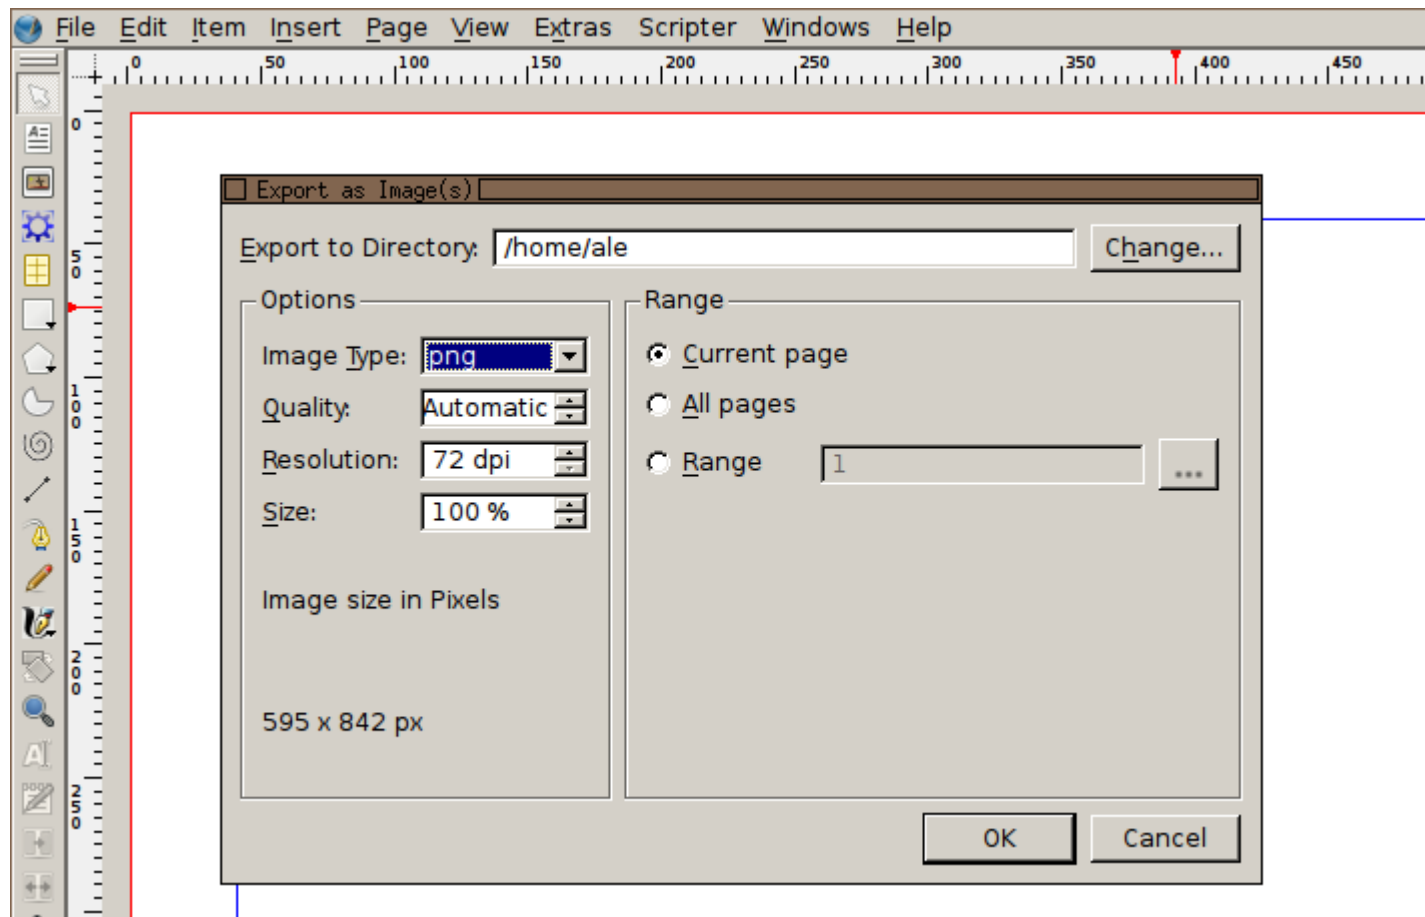

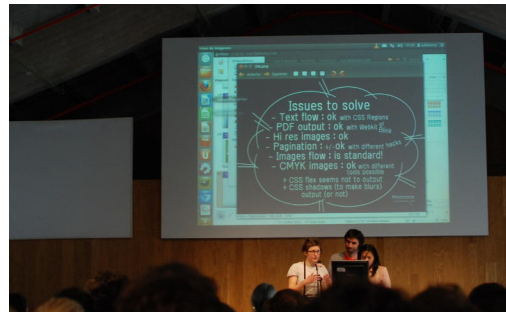

... show it!

Piping filenames

And what about the publishing world?

/me likes HTML and CSS.
